Subject Index

Acid–base properties
Acid-base properties of $H_{3+n}PV_nMo_{12-n}O_{40}$ heteropolyacids, pure and supported on $K_3PMo_{12}O_{40}$ 153
Ageing
Effect of pressure on the transformation of methanol into hydrocarbons on an amorphous silica–alumina 185
Alkaline earth oxide
Promoting effects of alkaline earth oxides on vapor phase carbonylation of ethene over cluster-derived cobalt catalysts 281
Alumina
Effect of alumina supports on the properties of supported nickel catalysts 289
Aluminophosphate
MnAPO-5 as catalyst for ethane oxydehydrogenation 113
Ammonia synthesis
Effect of barium addition on the ammonia synthesis activity of cesium promoted ruthenium catalyst supported on carbon-covered alumina (CCA) L1
Arsenious oxide
Evidence of the interaction between arsenious oxide and molybdenum oxide in DENOX catalysts by structure analysis of $MoAs_2O_7$ L19
Barium
Kinetics of carbon monoxide oxidation over Y-Ba-Cu-O perovskites 267
Barium
Effect of barium addition on the ammonia synthesis activity of cesium promoted ruthenium catalyst supported on carbon-covered alumina (CCA) L1
n-Butane
Oxidation states of vanadium in V-P-O oxidation catalysts: ^{31}P NMR by spin-echo mapping 83
Caesium
Effect of barium addition on the ammonia synthesis activity of cesium promoted ruthenium catalyst supported on carbon-covered alumina (CCA) L1
Calcium oxide/alumina
Pyrolysis products dependence on the nature of heavy hydrocarbon feedstock 125
Carbon monoxide hydrogenation
Hydrocarbon synthesis from carbon monoxide and hydrogen on impregnated cobalt catalysts. I. Physico-chemical properties of 10% cobalt/alumina and 10% cobalt/silica 65
Carbon monoxide hydrogenation
Effect of cobalt source on the reduction properties of silica-supported cobalt catalysts 97
Carbon monoxide hydrogenation
Effect of alumina supports on the properties of supported nickel catalysts 289
Carbon monoxide oxidation
Kinetics of carbon monoxide oxidation over Y-Ba-Cu-O perovskites 267
Carbon-alumina
Effect of barium addition on the ammonia synthesis activity of cesium promoted ruthenium catalyst supported on carbon-covered alumina (CCA) L1
Carbonylation
Promoting effects of alkaline earth oxides on vapor phase carbonylation of ethene over cluster-derived cobalt catalysts 281
Carburization
Effect of metal-support reaction on carburization of supported catalysts. I. Palladium on silica 173
Catalyst characterization (^{31}P NMR)
Oxidation states of vanadium in V-P-O oxidation catalysts: ^{31}P NMR by spin-echo mapping 83
Catalyst characterization (adsorption, iso-electric point, TPR, TPSR)
Effect of alumina supports on the properties of supported nickel catalysts 289
Catalyst characterization (AES, BET, Moessbauer spectroscopy, SEM, XRD)
Effects of the method of preparation of MgC_2O_4 as a support precursor on the properties of iron/magnesium oxide catalysts 17
Catalyst characterization (IR)
H-ZSM-5 supported Ga_2O_3 dehydrocyclisation catalysts: Infrared spectroscopic evidence of gallium oxide surface mobility L13
Catalyst characterization (TGA/DTA, XRD)
Effect of tetraalkylammonium, alcohol and amine templates on the synthesis and high-

pressure propene oligomerisation activity of ZSM-type zeolites 313
Catalyst characterization (TPO)
Temperature-programmed oxidation of sulfided nickel–molybdate/alumina catalysts: Change of composition and structure of active metals 39
Catalyst characterization (TPR, XPS, XRD)
Effect of cobalt source on the reduction properties of silica-supported cobalt catalysts 97
Catalyst characterization (TPR, XPS, XRD, NO adsorption)
Effects of starting cobalt salt upon the cobalt–alumina interactions and hydrodesulfurization activity of CoO/Al_2O_3 249
Catalyst characterization (XRD)
Effect of metal-support reaction on carburization of supported catalysts. I. Palladium on silica 173
Catalyst preparation (coprecipitation)
Preparation and thermal reactivity of nickel/chromium and nickel/aluminium hydrotalcite-type precursors 217
Catalyst preparation (precipitation)
Effects of the method of preparation of MgC_2O_4 as a support precursor on the properties of iron/magnesium oxide catalysts 17
Catalyst preparation (templates)
Synthesis of highly siliceous ZSM-5 using diaminoalkanes as templates 27
Catalyst preparation (thermal decomposition)
Catalytic decomposition of nitrous oxide on $Cu_xCo_{3-x}O_4$ spinels 165
Catalyst preparation (wet impregnation)
Effects of starting cobalt salt upon the cobalt–alumina interactions and hydrodesulfurization activity of CoO/Al_2O_3 249
Cobalt
Effect of cobalt source on the reduction properties of silica-supported cobalt catalysts 97
Cobalt
Promoting effects of alkaline earth oxides on vapor phase carbonylation of ethene over cluster-derived cobalt catalysts 281
Cobalt alumina spinel
Investigation of $CoAl_2O_4$, $Cu/CoAl_2O_4$ and $Co/CoAl_2O_4$ catalysts for the formation of oxygenates from a carbon monoxide-carbon dioxide-hydrogen mixture 135
Cobalt oxide/alumina
Effects of starting cobalt salt upon the cobalt–alumina interactions and hydrodesulfurization activity of CoO/Al_2O_3 249
Cobalt salts
Effects of starting cobalt salt upon the cobalt–alumina interactions and hydrodesulfurization activity of CoO/Al_2O_3 249
Cobalt sulphide
Effects of starting cobalt salt upon the cobalt–alumina interactions and hydrodesulfurization activity of CoO/Al_2O_3 249
Cobalt-alumina interactions
Effects of starting cobalt salt upon the cobalt–alumina interactions and hydrodesulfurization activity of CoO/Al_2O_3 249
Cobalt/alumina
Hydrocarbon synthesis from carbon monoxide and hydrogen on impregnated cobalt catalysts. I. Physico-chemical properties of 10% cobalt/alumina and 10% cobalt/silica 65
Cobalt/alumina
Investigation of $CoAl_2O_4$, $Cu/CoAl_2O_4$ and $Co/CoAl_2O_4$ catalysts for the formation of oxygenates from a carbon monoxide-carbon dioxide-hydrogen mixture 135
Cobalt/silica
Hydrocarbon synthesis from carbon monoxide and hydrogen on impregnated cobalt catalysts. I. Physico-chemical properties of 10% cobalt/alumina and 10% cobalt/silica 65
Coke formation
Effect of pressure on the transformation of methanol into hydrocarbons on an amorphous silica–alumina 185
Copper
Kinetics of carbon monoxide oxidation over Y-Ba-Cu-O perovskites 267
Copper-cobalt oxide
Catalytic decomposition of nitrous oxide on $Cu_xCo_{3-x}O_4$ spinels 165
Copper/cobalt–alumina
Investigation of $CoAl_2O_4$, $Cu/CoAl_2O_4$ and $Co/CoAl_2O_4$ catalysts for the formation of oxygenates from a carbon monoxide-carbon dioxide-hydrogen mixture 135
Crystal size

Effect of tetraalkylammonium, alcohol and amine templates on the synthesis and high-pressure propene oligomerisation activity of ZSM-type zeolites 313
Crystallinity
MnAPO-5 as catalyst for ethane oxydehydrogenation 113
Deactivation
Influences of oxygen-containing substances on deactivation of sulfided molybdate catalysts 55
Dehydration
Acid–base properties of $H_{3+n}PV_nMo_{12-n}O_{40}$ heteropolyacids, pure and supported on $K_3PMo_{12}O_{40}$ 153
Dehydrocyclisation
H-ZSM-5 supported Ga_2O_3 dehydrocyclisation catalysts: Infrared spectroscopic evidence of gallium oxide surface mobility L13
DeNOx catalysts
Evidence of the interaction between arsenious oxide and molybdenum oxide in DENOX catalysts by structure analysis of $MoAs_2O_7$ L19
Diaminoalkanes
Synthesis of highly siliceous ZSM-5 using diaminoalkanes as templates 27
Ethane oxydehydrogenation
MnAPO-5 as catalyst for ethane oxydehydrogenation 113
Ethene
Pyrolysis products dependence on the nature of heavy hydrocarbon feedstock 125
Ethene
Promoting effects of alkaline earth oxides on vapor phase carbonylation of ethene over cluster-derived cobalt catalysts 281
FCC
Effect of operation conditions on the behaviour of ZSM-5 addition to a RE-USY FCC catalyst 195
Fischer–Tropsch synthesis
Fischer–Tropsch Synthesis: A measure of the contribution of hydrogenolysis using a doubly promoted iron catalyst in a continuous stirred tank reactor 237
Gallium oxide
H-ZSM-5 supported Ga_2O_3 dehydrocyclisation catalysts: Infrared spectroscopic evidence of gallium oxide surface mobility L13
Heavy oils
Pyrolysis products dependence on the nature of heavy hydrocarbon feedstock 125
Heteropolyacids
Acid-base properties of $H_{3+n}PV_nMo_{12-n}O_{40}$ heteropolyacids, pure and supported on $K_3PMo_{12}O_{40}$ 153
Hydrocarbon synthesis
Effects of the method of preparation of MgC_2O_4 as a support precursor on the properties of iron/magnesium oxide catalysts 17
Hydrocarbons
Effect of pressure on the transformation of methanol into hydrocarbons on an amorphous silica-alumina 185
Hydrodenitrogenation
Influences of oxygen-containing substances on deactivation of sulfided molybdate catalysts 55
Hydrodesulphurization
Effects of starting cobalt salt upon the cobalt–alumina interactions and hydrodesulfurization activity of CoO/Al_2O_3 249
Hydrogenation
Preparation and pretreatment effects on metal decoration in Rh/Al_2O_3 1
Hydrogenolysis
Fischer–Tropsch Synthesis: A measure of the contribution of hydrogenolysis using a doubly promoted iron catalyst in a continuous stirred tank reactor 237
Hydrogenolysis
Preparation and pretreatment effects on metal decoration in Rh/Al_2O_3 1
Hydrotalcite
Preparation and thermal reactivity of nickel/chromium and nickel/aluminium hydrotalcite-type precursors 217
Iron
Fischer–Tropsch Synthesis: A measure of the contribution of hydrogenolysis using a doubly promoted iron catalyst in a continuous stirred tank reactor 237
Iron/magnesia
Effects of the method of preparation of MgC_2O_4 as a support precursor on the properties of iron/magnesium oxide catalysts 17
Kinetics
Catalytic decomposition of nitrous oxide on $Cu_xCo_{3-x}O_4$ spinels 165
Kinetics

Kinetics of carbon monoxide oxidation over Y-Ba-Cu-O perovskites 267
Lanthanum oxide
Preparation and pretreatment effects on metal decoration in Rh/Al_2O_3 1
Manganese
MnAPO-5 as catalyst for ethane oxydehydrogenation 113
Metal decoration
Preparation and pretreatment effects on metal decoration in Rh/Al_2O_3 1
Metal–support reaction
Effect of metal–support reaction on carburization of supported catalysts. I. Palladium on silica 173
Methanol
Effect of pressure on the transformation of methanol into hydrocarbons on an amorphous silica–alumina 185
Methanol formation
Investigation of $CoAl_2O_4$, $Cu/CoAl_2O_4$ and $Co/CoAl_2O_4$ catalysts for the formation of oxygenates from a carbon monoxide-carbon dioxide-hydrogen mixture 135
MnAPO-5
MnAPO-5 as catalyst for ethane oxydehydrogenation 113
Molecular sieves
MnAPO-5 as catalyst for ethane oxydehydrogenation 113
Molybdenum oxide
Evidence of the interaction between arsenious oxide and molybdenum oxide in DENOX catalysts by structure analysis of $MoAs_2O_7$ L19
Nickel
Effect of alumina supports on the properties of supported nickel catalysts 289
Nickel oxide
Preparation and thermal reactivity of nickel/chromium and nickel/aluminium hydrotalcite-type precursors 217
Nickel–molybdate/alumina
Temperature-programmed oxidation of sulfided nickel–molybdate/alumina catalysts: Change of composition and structure of active metals 39
Nickel-molybdenum
Influences of oxygen-containing substances on deactivation of sulfided molybdate catalysts 55
Nickel/aluminium
Preparation and thermal reactivity of nickel/chromium and nickel/aluminium hydrotalcite-type precursors 217
Nickel/chromium
Preparation and thermal reactivity of nickel/chromium and nickel/aluminium hydrotalcite-type precursors 217
Nitrous oxide decomposition
Catalytic decomposition of nitrous oxide on $Cu_xCo_{3-x}O_4$ spinels 165
Octacosane
Fischer–Tropsch Synthesis: A measure of the contribution of hydrogenolysis using a doubly promoted iron catalyst in a continuous stirred tank reactor 237
Operating conditions
Effect of operation conditions on the behaviour of ZSM-5 addition to a RE-USY FCC catalyst 195
Oxidation catalysts
Oxidation states of vanadium in V-P-O oxidation catalysts: ^{31}P NMR by spin-echo mapping 83
Oxidation state
Effect of cobalt source on the reduction properties of silica-supported cobalt catalysts 97
Oxidation states
Oxidation states of vanadium in V-P-O oxidation catalysts: ^{31}P NMR by spin-echo mapping 83
Oxydehydrogenation
MnAPO-5 as catalyst for ethane oxydehydrogenation 113
Oxygen containing substances
Influences of oxygen-containing substances on deactivation of sulfided molybdate catalysts 55
Oxygenates
Investigation of $CoAl_2O_4$, $Cu/CoAl_2O_4$ and $Co/CoAl_2O_4$ catalysts for the formation of oxygenates from a carbon monoxide-carbon dioxide-hydrogen mixture 135
Palladium/silica
Effect of metal–support reaction on carburization of supported catalysts. I. Palladium on silica 173
Perovskites

Kinetics of carbon monoxide oxidation over Y-Ba-Cu-O perovskites 267
Physico-chemical properties
Hydrocarbon synthesis from carbon monoxide and hydrogen on impregnated cobalt catalysts. I. Physico-chemical properties of 10% cobalt/alumina and 10% cobalt/silica 65
Pore size
Effect of tetraalkylammonium, alcohol and amine templates on the synthesis and high-pressure propene oligomerisation activity of ZSM-type zeolites 313
Praseodymium
Kinetics of carbon monoxide oxidation over Y-Ba-Cu-O perovskites 267
Precursors
Preparation and thermal reactivity of nickel/chromium and nickel/aluminium hydrotalcite-type precursors 217
Pressure effects
Effect of pressure on the transformation of methanol into hydrocarbons on an amorphous silica-alumina 185
Pretreatment
Hydrocarbon synthesis from carbon monoxide and hydrogen on impregnated cobalt catalysts. I. Physico-chemical properties of 10% cobalt/alumina and 10% cobalt/silica 65
Pretreatment effects
Preparation and pretreatment effects on metal decoration in Rh/Al_2O_3 1
Propanoic acid
Promoting effects of alkaline earth oxides on vapor phase carbonylation of ethene over cluster-derived cobalt catalysts 281
n-Propanol
Promoting effects of alkaline earth oxides on vapor phase carbonylation of ethene over cluster-derived cobalt catalysts 281
Propene
Pyrolysis products dependence on the nature of heavy hydrocarbon feedstock 125
Propene oligomerization
Effect of tetraalkylammonium, alcohol and amine templates on the synthesis and high-pressure propene oligomerisation activity of ZSM-type zeolites 313
Pyrolysis
Pyrolysis products dependence on the nature of heavy hydrocarbon feedstock 125
Rare earths
Effect of operation conditions on the behaviour of ZSM-5 addition to a RE-USY FCC catalyst 195
Reducibility
Preparation and thermal reactivity of nickel/chromium and nickel/aluminium hydrotalcite-type precursors 217
Reduction
Effect of cobalt source on the reduction properties of silica-supported cobalt catalysts 97
Regeneration
Effect of metal–support reaction on carburization of supported catalysts. I. Palladium on silica 173
Rhodium
Preparation and pretreatment effects on metal decoration in Rh/Al_2O_3 1
Ruthenium
Effect of barium addition on the ammonia synthesis activity of cesium promoted ruthenium catalyst supported on carbon-covered alumina (CCA) L1
Selectivity (aromatics)
Effect of pressure on the transformation of methanol into hydrocarbons on an amorphous silica-alumina 185
Selectivity (ethene)
MnAPO-5 as catalyst for ethane oxydehydrogenation 113
Silica supports
Effect of cobalt source on the reduction properties of silica-supported cobalt catalysts 97
Silica–alumina
Effect of pressure on the transformation of methanol into hydrocarbons on an amorphous silica–alumina 185
Simultaneous regeneration
Pyrolysis products dependence on the nature of heavy hydrocarbon feedstock 125
Steam
Pyrolysis products dependence on the nature of heavy hydrocarbon feedstock 125
Steam reforming
Preparation and thermal reactivity of nickel/chromium and nickel/aluminium hydrotalcite-type precursors 217
Steam regeneration

Pyrolysis products dependence on the nature of heavy hydrocarbon feedstock 125
Structure analysis
Evidence of the interaction between arsenious oxide and molybdenum oxide in DENOX catalysts by structure analysis of $MoAs_2O_7$ L19
Sulphided Ni-Mo catalysts
Temperature-programmed oxidation of sulfided nickel–molybdate/alumina catalysts: Change of composition and structure of active metals 39
Sulphided nickel–molybdate catalysts
Influences of oxygen-containing substances on deactivation of sulfided molybdate catalysts 55
Support effects
Effect of alumina supports on the properties of supported nickel catalysts 289
Support precursor effects
Effects of the method of preparation of MgC_2O_4 as a support precursor on the properties of iron/magnesium oxide catalysts 17
Syngas conversion
Fischer–Tropsch Synthesis: A measure of the contribution of hydrogenolysis using a doubly promoted iron catalyst in a continuous stirred tank reactor 237
Syngas conversion
Hydrocarbon synthesis from carbon monoxide and hydrogen on impregnated cobalt catalysts. I. Physico-chemical properties of 10% cobalt/alumina and 10% cobalt/silica 65
Syngas conversion
Investigation of $CoAl_2O_4$, $Cu/CoAl_2O_4$ and $Co/CoAl_2O_4$ catalysts for the formation of oxygenates from a carbon monoxide-carbon dioxide-hydrogen mixture 135
Syngas conversion
Effect of alumina supports on the properties of supported nickel catalysts 289
Synthesis
Synthesis of highly siliceous ZSM-5 using diaminoalkanes as templates 27
Temperature-programmed oxidation
Temperature-programmed oxidation of sulfided nickel–molybdate/alumina catalysts: Change of composition and structure of active metals 39
Tetraalkylammonium ions
Effect of tetraalkylammonium, alcohol and amine templates on the synthesis and high-pressure propene oligomerisation activity of ZSM-type zeolites 313
Two-stage pyrolysis
Pyrolysis products dependence on the nature of heavy hydrocarbon feedstock 125
Vanadium-phosphorus oxides
Oxidation states of vanadium in V-P-O oxidation catalysts: ^{31}P NMR by spin-echo mapping 83
Vapour phase carbonylation
Promoting effects of alkaline earth oxides on vapor phase carbonylation of ethene over cluster-derived cobalt catalysts 281
Yttrium
Kinetics of carbon monoxide oxidation over Y-Ba-Cu-O perovskites 267
Zeolites
Synthesis of highly siliceous ZSM-5 using diaminoalkanes as templates 27
Zeolites
Effect of operation conditions on the behaviour of ZSM-5 addition to a RE-USY FCC catalyst 195
Zeolites
Effect of tetraalkylammonium, alcohol and amine templates on the synthesis and high-pressure propene oligomerisation activity of ZSM-type zeolites 313
Zeolites
H-ZSM-5 supported Ga_2O_3 dehydrocyclisation catalysts: Infrared spectroscopic evidence of gallium oxide surface mobility L13
ZSM-5
Synthesis of highly siliceous ZSM-5 using diaminoalkanes as templates 27
ZSM-5
Effect of operation conditions on the behaviour of ZSM-5 addition to a RE-USY FCC catalyst 195
ZSM-5
Effect of tetraalkylammonium, alcohol and amine templates on the synthesis and high-pressure propene oligomerisation activity of ZSM-type zeolites 313
